

Co-funded by the Horizon 2020 Framework Programme of the European Union

ENEON

ENEON is the European Network of Earth Observation Networks, funded by the European Union under the H2020 ConnectinGEO project mainly including non-space networks to better coordinate them, with the aim of stimulating a more harmonized and coherent coverage of the European EO networks, reemphasizing the political strategic targets, and create opportunities.

Dynamic graph on existing European EO networks. Based on JSON-LD and JavaScript
